■ Context

Assess, anticipate & decide

To complement the capabilities of the already robust and comprehensive iMX system, CODIX has introduced a Business Intelligence module — iMX Analysis and Decision.

iMX AD allows the enterprise to make key decisions by providing a reliable, 360° view with complete and up-to-date data. iMX AD incorporates industrialized analytics into day-to-day business operations and facilitates financial planning, forecasting and budgeting activities.

BI solution

iMX AD provides the ability to create visual dashboards and ad hoc queries that can be published to several stakeholders, using different media channels and formats.

The creation and maintenance of reports require modest BI knowledge, which makes the capabilities of the system fully accessible to our customers, all the while providing an endless business universe at their fingertips.

Ready to start

With iMX AD, data restitution is fully integrated with all other iMX modules, thus also providing business automation solutions.

A straightforward “off-the-shelf” approach can be adopted for all standard reports and business objects.

Your added value

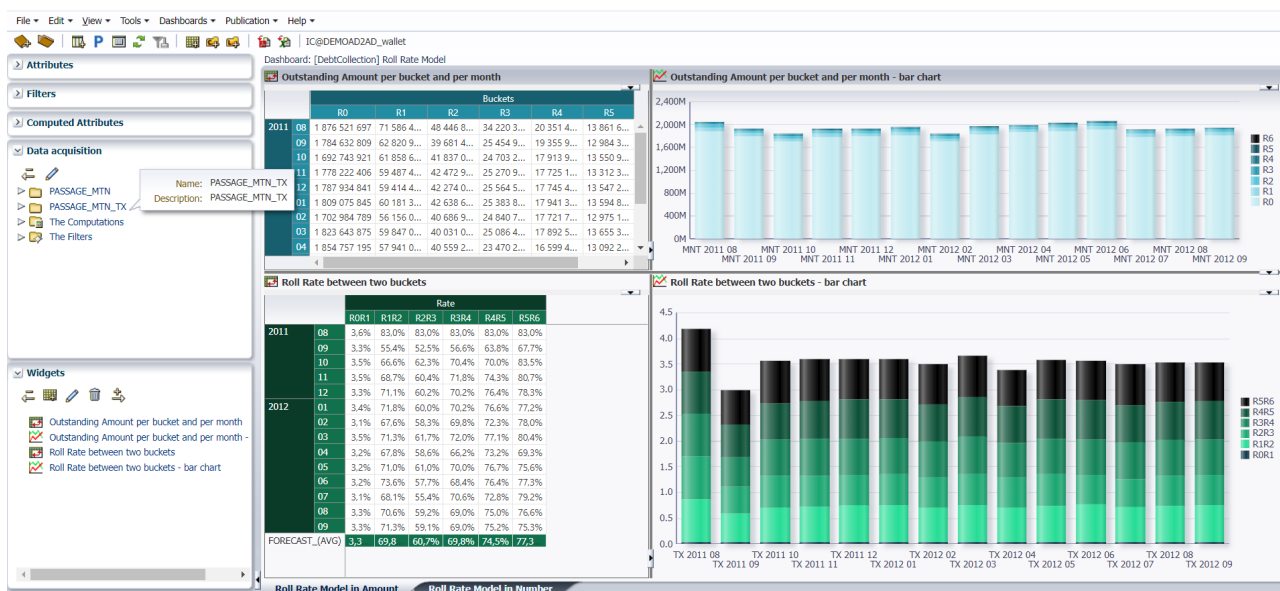

CODIX's philosophy is simple and powerfully fundamental. It works for your business by:

- Focusing on and applying all the business expertise accumulated thanks to our ample experience within Consumer Finance
- Continually enriching and functionally improving the solution, objects and reports

Functional Overview

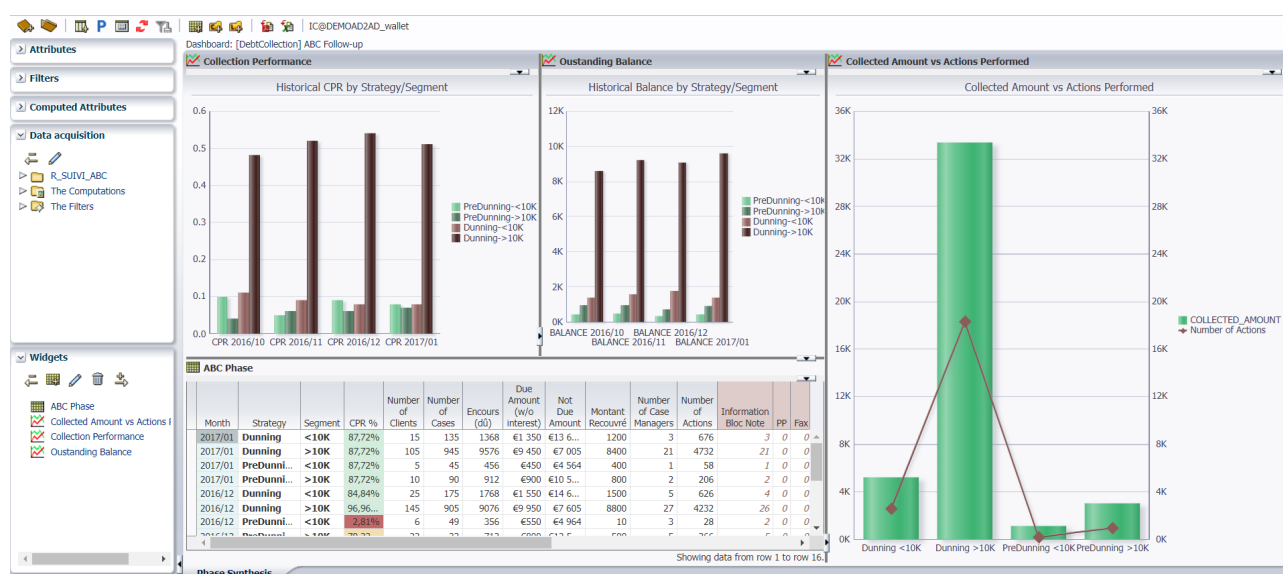

iMX AD provides a set of reports that:

- Assess the trend of your portfolio (vintage model, roll rate & more)
- Track business performance
- Generate regulatory reports and audit policies
- Provide multiple currencies
- Allow insertion of customized legal entities
- Centre around your clients and product segmentation

iMX AD provides a Business Universe that:

- Performs ad hoc queries
- Leverages existing reports
- Creates new reports from scratch
- Follows 3NF, Star Schema notations & more
- Has contextual documentation
- Provides understandable business and finance word labels

Automatically publish fully customizable reports based on periodicity, recipients, layout & more using the scheduling and publication feature provided by iMX AD.

■ Architecture

iMX AD is fully integrated with all other iMX modules and CODIX ensures their synchronization through the continuous functional enrichment and improvement of the solution.

iMX AD gives you:

- A fully ready-to-use and reusable Business Universe
- Refresh mechanism
- Restitution tool
- Publication tool
- Off-the-shelf reports

All iMX AD components are developed and maintained by CODIX. The module relies on a dedicated database, which is refreshed on a daily basis without impacting the day-to-day performance and activity in iMX.

The end user needs only a web browser to execute heavy queries, view and administrate reports.

■ Off-the-shelf Reporting

iMX Analysis & Decision provides a standard set of useful reports, tracking your KPIs in an instant, allowing you to make informed decisions at the click of a button. The fully customizable system allows for both canned and ad hoc reporting capabilities.

Some of these off-the-shelf reports include:

- **A Vintage Model:** explore the collection performance rate based on the Vintage Model Methodology
- **A Roll Rate Model:** report loss forecasting based on roll-rate methodologies
- **ABC Follow-Up:** analyze strategy execution according to collection performance in regard to cost
- **Inventory Follow-Up:** report the trend of the stock and collection performance rate (per collector or 3rd party) over X months
- **Case Manager Follow-Up:** challenge case managers over different time slots
- **Revenue Follow-Up:** report the revenue per allocated amount
- **Telephony Follow-Up:** explore the telephony activity and its performance
- **Audit Reports:** an overview of iMX usage per user, bank account changes, contact information & more

Use iMX AD to track the performance of the external collection agencies:

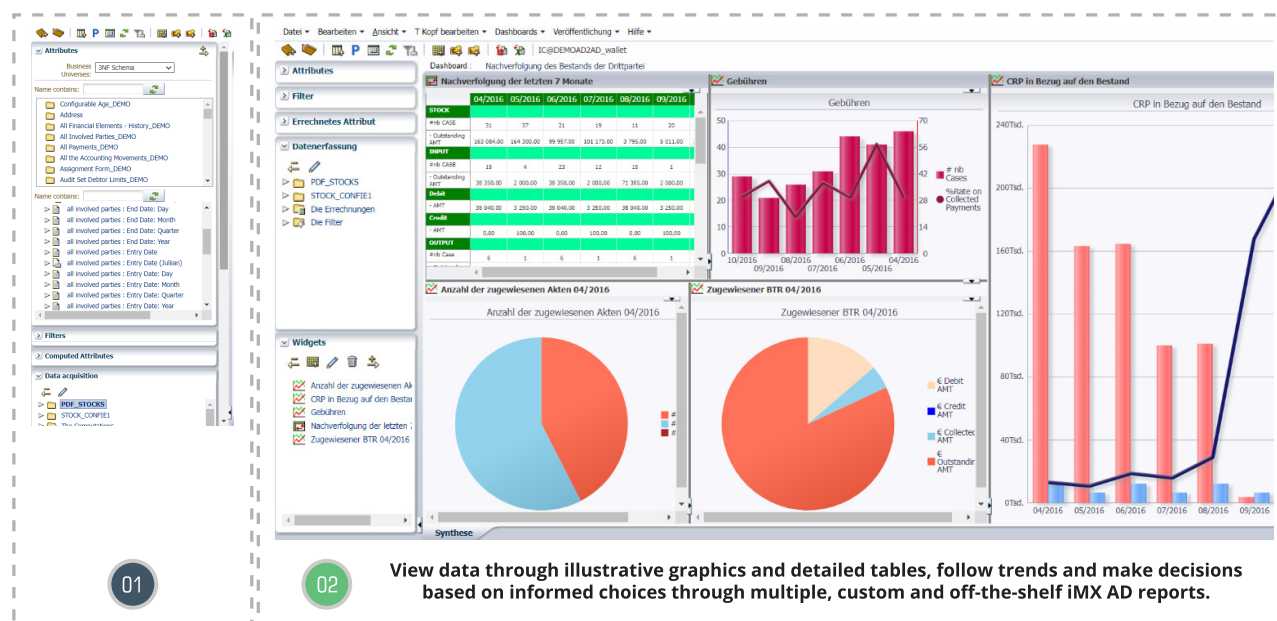

Use iMX AD to segment into buckets and manage your debt portfolio:

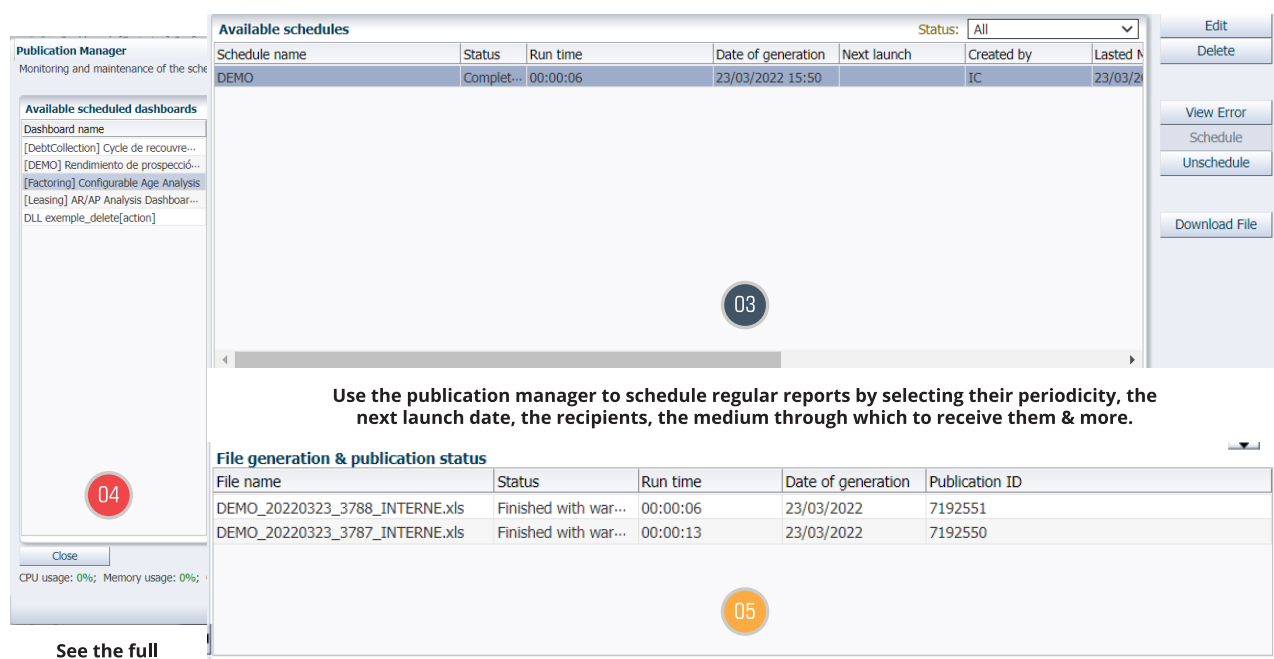

Meet iMX AD

iMX AD and its user-friendly features allow instant report creation through multiple business universes, parameter application, computed attributes, charts and pivot tables. Complete your report by extracting it as a one-off or schedule it to be received **on a regular basis**.

View data through illustrative graphics and detailed tables, follow trends and make decisions based on informed choices through multiple, custom and off-the-shelf iMX AD reports.

Choose between business universes, create filters, compute attributes and follow the data acquisition process with ease.

Use the publication manager to schedule regular reports by selecting their periodicity, the next launch date, the recipients, the medium through which to receive them & more.

See the full list of already scheduled reports.

Check previous reports, their status & the date they were last published.
