iMX Tel is the telephony module integrated into the iMX solution. It is a modern, fully featured dialer offering the following functionalities:

- Possibility to integrate your call center with iMX
- Call automation
- Possibility to have your own IVR
- Prerecorded interactive messages when making phone calls
- Finding the best iMX user for the call
- Scheduling phone meetings
- Making credit card payments by phone
- Answering machine recognition and silence detection
- Activity supervision
- Statistics
- Headset and phone user mode
- Recording and streaming calls
- Organizing calls into campaigns
- Fine-tuning the criteria used for filtering iMX cases
- Call transfers and consultation calls
- Voice mail provision and integration
- And lots of other functions

iMX Tel is flexible. It can operate in:

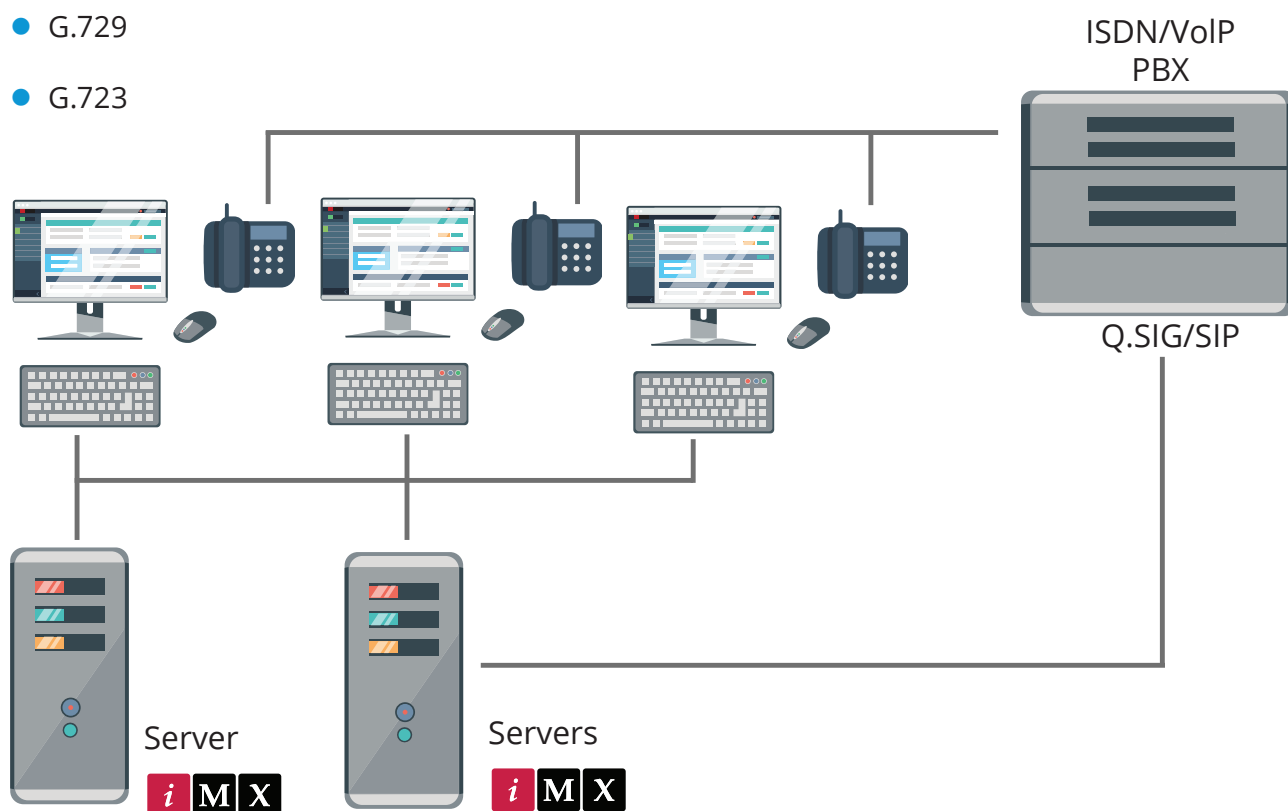

- Hosted architecture
- Distributed architecture
- Mixed (Hosted + Distributed) architecture

It can be deployed worldwide and interconnect call centers in different countries.

iMX Tel can easily be integrated. It supports:

- ISDN (Q.SIG)
- VoIP (SIP)
- G.722
- G.71
- G.726
- G.729
- G.723

iMX Tel is based on Dialogic, the world leader in the computer telephony industry.

- Springware
- GlobalCall
- Host Media Processing

Dialogic®

iMX Tel is powerful and functionally rich. It can perform:

- Automatic calls — one call per agent

- Overdialing calls — more calls than free agents

- Predictive calls — estimate when to perform the call

- Preview calls — first preview the case and then optionally call

- Push Vocal — dial and play prerecorded messages

- Push Vocal with IVR — dial and run an IVR schema

- Direct calls — manual call initiation

- Telephony appointments — schedule a phone meeting

- Call Transfers — transfer the call to another agent

- Call Transfers to IVR — transfer the call to an IVR schema

- Consultation calls — consult and optionally transfer the call

- Positive Answering Machine Detection — detects whether the person on the other end of the line is a human or an answering machine

- Call Recording — record, store, play and stream calls

- Open line — agent mode optimized for using a headset

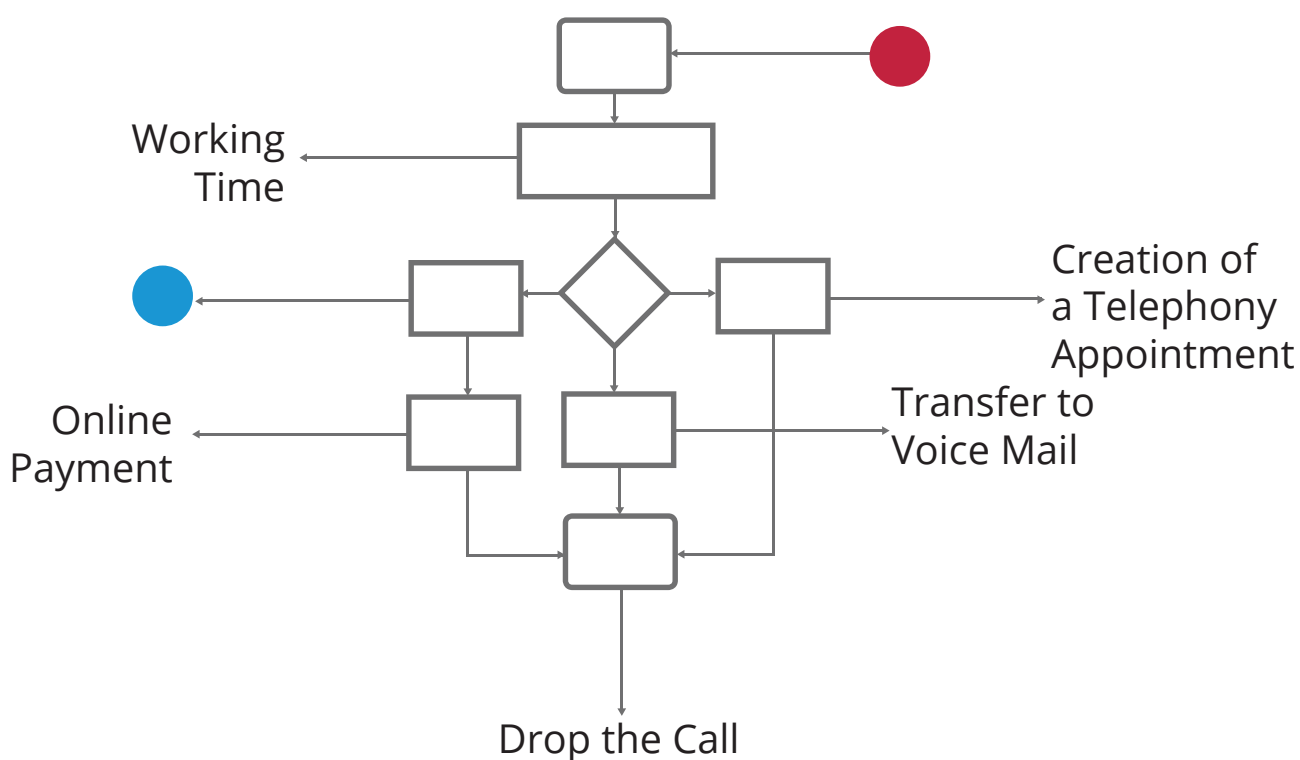

- Closed line — agent mode optimized for using a phone

- IVR management with rich function sets — worktime check, online payment, automatic telephony appointment, voice mail, etc.

IVR (Interactive Voice Response) Theme

iMX Tel organizes calls into campaigns. A campaign is a set of:

- Rules
- Criteria
- Authorizations
- Parameters

Campaign

How to dial? Automatic, overdialing, incoming, etc. calls	What to dial? Case selected by the database using flexible filters and criteria
Who will receive the call? The user who meets specific criteria	Parameters? Rich set of settings and customizations

Campaign creation allows the user to check many different criteria concerning the case based on the current status of the case, creation date, case balance, variables, presence or absence of information.

The screenshot displays the 'iMX_TEL' application window. The main menu bar includes 'ADMIN. iMX TEL' and various icons. The sub-menu for 'CAMPAIGN' is open, showing 'MAIN CRITERIA' as the active tab. The 'MAIN CRITERIA' section contains several fields and options:

- Campaign name:** BT_TEST
- Variable criterion nb 1-6:** Six rows of checkboxes and dropdown menus.
- Priority processing:** A checkbox and a dropdown menu.
- Term bef./aft exp.:** A checkbox and a dropdown menu.
- Generation priority:** Radio buttons for 'Automatic start' and 'Manual start'.
- Sort by balance (Ascending/Descending):** A dropdown menu.
- Client:** CL JAPAN
- DATES OF CASES CREATION:** Fields for 'Start date' and 'End date'.
- DEBTORS BALANCE:** Fields for 'Min debtor balance', 'Principle Min', 'Max debtor balance', and 'Principle Max'.
- DIALLING MODE:** Radio buttons for 'Automatic', 'Overdialling', 'Predictive', 'Push Vocal', 'Preview', 'Incoming call', and 'Schedules'.

iMX Tel procures many real-time and post factum statistics about incoming and outgoing campaign activity and results: number of calls, rates of the calls processed, recalls, instances when the line is busy, average duration of calls, etc.
